EDUCATION & SKILLS

Quinnipiac University | Hamden, CT

- Data Science, B.S. 3+1 Program; GPA 3.5; Expected May 2026
- Minors: Computer Science and Economics
- Cybersecurity, M.S.; Expected May 2027

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Java, R

Web: React, Next.js, Tailwind CSS, HTML/CSS

Platforms: Git, Supabase/Postgres, Vercel, VS Code, Linux, VirtualBox

Data/ML: pandas, scikit-learn, matplotlib, Jupyter, model evaluation

TECHNICAL EXPERIENCE

Thrive2030 | Incoming Systems & AI Integration Intern Summer 2026

- Selected for a role focused on improving business operations by designing AI-assisted workflows, automation processes, and internal systems for a growing company.
- Will improve information flow and reduce manual work by evaluating AI/software tools, documenting workflows, and translating business needs into technical solutions.

TRaViS ASM | Cybersecurity / Software Intern Summer 2025

- Built hands-on technical foundation across Linux, Windows, virtual machines, and networking by configuring and troubleshooting sandbox-style testing environments.
- Improved understanding of cybersecurity software workflows by working with the lead developer of an automated penetration testing platform.

SaloStack / Client Web Projects | Co-Founder / Developer

2025 - Present

- Built and delivered responsive client-facing websites by gathering requirements, designing page structure, and implementing production-ready web experiences.
- Improved small-business online presence by creating service pages, contact flows, mobile layouts, and SEO-friendly site structure.

Additional Experience | Cafe Team Member / Personal Care Assistant

2021 - Present

- Built communication, reliability, and problem-solving skills by balancing fast-paced customer service responsibilities and individualized care needs.

TECHNICAL PROJECTS

Behavior-Based Malware Detection Capstone

Python, pandas, scikit-learn, Sysmon, Jupyter

- Built a Python ML pipeline using 50 sandbox executions and 13 engineered Sysmon behavior features to classify benign vs. suspicious activity.
- Compared Logistic Regression and Random Forest models with repeated stratified cross-validation; Random Forest achieved 0.878 ROC-AUC.
- Created evaluation visuals including confusion matrices, ROC curves, feature importance, correlation heatmaps, and performance tables.

Personal Resume / Project Website

Next.js, TypeScript, React, Tailwind CSS, Vercel

- Built and deployed a personal portfolio site with responsive UI components to showcase projects, internship experience, and career materials.

Phi Delta Theta Alumni Website

Next.js, TypeScript, Tailwind CSS, Supabase/Postgres, Resend, Vercel

- Built a full-stack alumni platform with public pages, member portal, admin dashboard, profile claiming, alumni directory, and authentication workflows.
- Implemented Supabase/Postgres data features for profiles, CSV imports, newsletters, subscriptions, mentorship opportunities, and legacy memory submissions.
- Deployed the production site on Vercel with environment configuration and a custom domain.

ACTIVITIES & AWARDS

Phi Delta Theta Head of Alumni | VP, Quinnipiac Poker & Strategy Club | 1929 Scholarship First Place | Washington Center National Security Seminar
